

Still installing fat-client desktop emulation solutions?

STRATEGI ACCESS CAN HELP YOU:

- Reduce your annual maintenance and support costs by replacing your desktop emulation solution
- Provide an easy way to provide access to host applications for customers, suppliers and dealers
- Improve the user experience with graphically rich, intuitive interfaces that support all the power user functions

Strategi ACCESS™ is a revolutionary new browser-based host-access solution designed to provide power users with a robust and fully functional 5250 emulation experience without installing any desktop software.

PURPOSE-BUILT FOR POWER USERS - Other browser-based solutions often prove to be inadequate for power users who demand a heads down, highly productive data entry environment that enables them to power through memorized keystroke workflows, without waiting for a browser to catch up. Strategi ACCESS provides an improved user experience with graphically rich, intuitive user interfaces (no more green screens) that feature dynamically generated icons for function keys, colorful menu bullets and all the power user functions such as "type ahead."

EASILY ACCESS HOST REPORTS AND FILES - Unique push technology provides active delivery of host reports and files to desktop applications during emulation sessions, enabling users to receive and print reports and files from anywhere, anytime.

LEVERAGE A PLATFORM, NOT A SINGLE-PURPOSE SOLUTION - Strategi ACCESS is part of a smartly engineered platform that enables organizations to leverage their legacy investments and skills to evolve their technology to meet their future modernization, extension and integration needs. You may be solving your host-access needs now, but you're really positioning this technology initiative to support long-term growth and expansion.

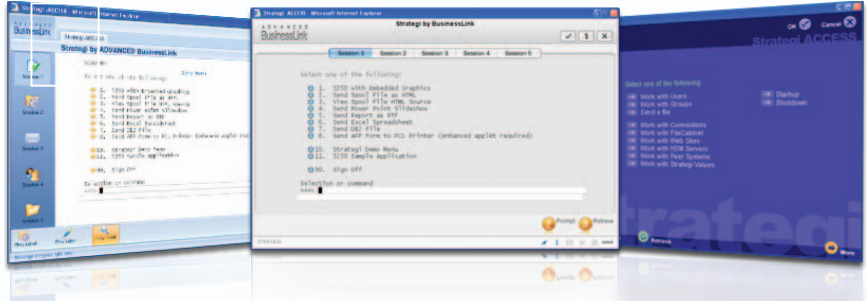

COMPELLING ALTERNATIVE TO MAINTENANCE-INTENSIVE DESKTOP SOLUTIONS - Strategi ACCESS makes it easy to provide access to host applications from any browser for internal and external users such as customers, suppliers and dealers, without distributing, installing or maintaining host access software.

FEATURES & BENEFITS

Graphically Rich Interfaces

Strategi ACCESS provides an improved user experience with intuitive user interfaces that automatically replace the look and feel of green screens.

Dynamic Icons

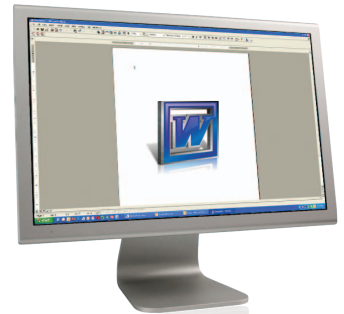

Replace function keys with meaningful icons for intuitive screen use.

Multi-Session Tabs

Eliminate multiple open windows to provide a streamlined session workflow.

Active Delivery of Host Reports and Files

to desktop applications during session, enabling users to receive and print reports and files from anywhere, anytime.

Zero-interactive

Programs run in batch mode and do not require System i interactive capability.

Native System i

Software installs directly on the host eliminating desktop client administration, maintenance and support.

Fastest Solution Available

Small Java applet outperforms all other browser solutions available on the market.

ABOUT ADVANCED BUSINESSLINK

Since 1987, ADVANCED BusinessLink has been pioneering the development of web-enablement, SOA and mobility solutions with their award-winning middleware software products. Our deep understanding of emerging technologies coupled with our core expertise in the IBM® System i platform, has enabled organizations to leverage their legacy investments and skills to evolve their technology to keep pace with industry best-practices.
